### Blue Polyester Silicone Tape

#### Product Data:

<b>Backing</b>	Polyester	0,061 mm
<b>Adhesive</b>	Silicone	0,036 mm
<b>Adhesion</b>	From Stainless Steel	11N/25 mm
<b>Color</b>	blue	
<b>Temperatur Resistance</b>	+220°C	

#### Description:

Single coated polyester high temperature silicone splicing tape provides a superior bond to the most difficult silicone release surfaces and interliners.

#### Features:

- Superior adhesion to silicone release surfaces
- Conformable polyester film is durable and resists tearing and punctures
- Chemically resistant
- Stable adhesive resists flow, oozing or slippage

#### Application Notes:

Designed to perform splicing applications on difficult silicone release surfaces even in high temperature environments.

To achieve ultimate adhesion, the bonding surface should be dry, clean and free of dirt and oils. The strength of the adhesive bond is dependent on the amount of surface area directly contacting the adhesive. Firm pressure is recommended to obtain good adhesive to surface contact.
